**out** 

ok so @notStacc just to give you some context. there has ...
will send you the relevant env vars to run this all locally 16:20

**staccdotsol** 16:20 

btw, 16:21 

**try jito** 16:21 

**out** 

we are using jito already 16:21

**Yes their uh** 16:21 

I know that hehe 16:21 

but use jito's new retry service 16:21 

**for bundles/regular tx** 16:21 

**out** 

the sendTransaction endpoint that they released? 16:21

**yea** 16:21 

**out** 

yeah we are using that already too 16:22

**solana is a mess** 16:23 

**hopefully patch soon** 16:23 

**out** 

ill send you the relevant part of the code 16:23

**thank** 16:23 

**out** 

you will see the insane amount of redundancy we have in place lol 16:23
